

elevating excellence

Inside this building, lives will be saved, babies will be born, hopes will be restored, compassion will be embraced, and excellence will be elevated.

After years of planning and building, the new Bridwell Tower has become a reality. For all those who played a part in its development and for the communities we serve, the completion of our addition is a significant milestone. But more important than finishing the structure is beginning the work that will take place inside, as our new facilities enhance our quality care and advance our continuing ability to provide our region with excellence in health care.

Outpatients will find convenient access to treatments and diagnostic testing.

The first floor of the Bridwell Tower is dedicated to outpatient services. Here patients will find spacious guest seating areas and comfortable places to receive treatments and diagnostic procedures.

Advanced diagnostic imaging will bring solutions to light.

Advanced imaging technology can mean more accurate diagnoses and more detailed treatment plans. It can also mean discovering medical conditions at their earliest — and most treatable — stages. In the new Bridwell Tower, we will offer a full spectrum of diagnostic imaging, from conventional X-rays to more advanced technologies. Our 64-slice CT scanner creates detailed 3-D images of the heart and other parts of the body. Other diagnostic tools include MRI, digital mammography and ultrasound.

Surgeons' skills will unite with the latest computer technology.

When you're facing surgery, you want the reassurance of knowing that your skilled surgical team has immediate access to advanced equipment and technology. The Bridwell Tower's third-floor surgical center offers just that. Many of the operating rooms were designed specifically for computer-assisted procedures. One very advanced operating room can accommodate minimally-invasive cardiovascular procedures and then convert into an open heart surgery suite if the need arises. With 14 operating suites in all, the Bridwell Tower has the capacity to serve the needs of our community today and well into the future.

New family members will be welcomed into the world.

The Bridwell Tower's fourth floor is the perfect place to meet the love of your life – your baby. Our labor and delivery rooms provide a home-like environment, while ensuring that advanced medical equipment is close at hand. Our highly trained and compassionate maternity nurses will encourage and support parents as they care for their newborns in family-centered, post-partum rooms. For newborns who have specialized medical needs, our Level II Special Care Nursery, and an experienced team of physicians and nurses, will be on hand to provide care. Families will also have plenty of opportunities to get acquainted with the Bridwell Tower birth facilities prior to baby's arrival, since prenatal classes and tours of the Mother & Baby Unit will be offered monthly.

Children's minds will be eased as their bodies are cared for.

The Pediatric Unit is designed to help reduce the anxiety that children may experience when placed in an unfamiliar environment to receive the medical and surgical care that they need. The colorful, aquatic décor provides a child-friendly atmosphere. Everything is specialized for little ones, from the equipment to the patient beds. The pediatric staff offers comfort, as well as care, not only to the pediatric patient, but to the entire family.

**You'll have all the care and services you can depend on,
in one convenient place.**

The opening of the Bridwell Tower will consolidate our campuses and encompass some of the most progressive medical care available anywhere. Whether you come to United Regional for diagnostic testing, treatment, surgery or for a visit with a hospitalized friend, you'll find everything in one convenient location.

Our Passion and our Purpose will continue to flourish.

The opening of the Bridwell Tower not only advances our services and technology, it deepens the United Regional passion of providing excellence in health care for the communities we serve, and our purpose of making a positive difference in the lives of others.

The Bridwell Tower is much more than a beautiful new building. It is our commitment to our community and the place where skill and compassion are applied to our life's work.
