

Uncontrolled bleeding is the number one cause of preventable death from trauma.

Continuing our commitment with Stop the Bleed education and awareness, United Regional is partnering with trauma leaders in our area to offer **BCon (Bleeding Control) for the Injured courses** to our community.

STOP THE BLEED[®]

What Everyone Should Know to Stop Bleeding After an Injury

This course, developed by the American College of Surgeons Committee on Trauma, has been developed for direct training for immediate responders (bystanders) and professional first responders in external hemorrhage control.

BCon for the Injured
